

The printf Method and String Formatting

Hui Chen

Department of Computer & Information Science

Brooklyn College

Objectives

- To format output using the **System.out.printf** method (§4.6).

Outline

- Discussed
 - The Math class and its methods and constants
 - The char data type and The Character class
 - The String data type and operations
 - Three “big” example programs
- We still have a problem. How do we format the output nicely on the console?
 - Using the `System.out.printf` method

The `System.out.printf` method

- How do we display nicely on the Console?
- Explore it using examples

The format method of String

- How do we display nicely on the Console?
- Explore it using examples

Questions
