

CISC 3120

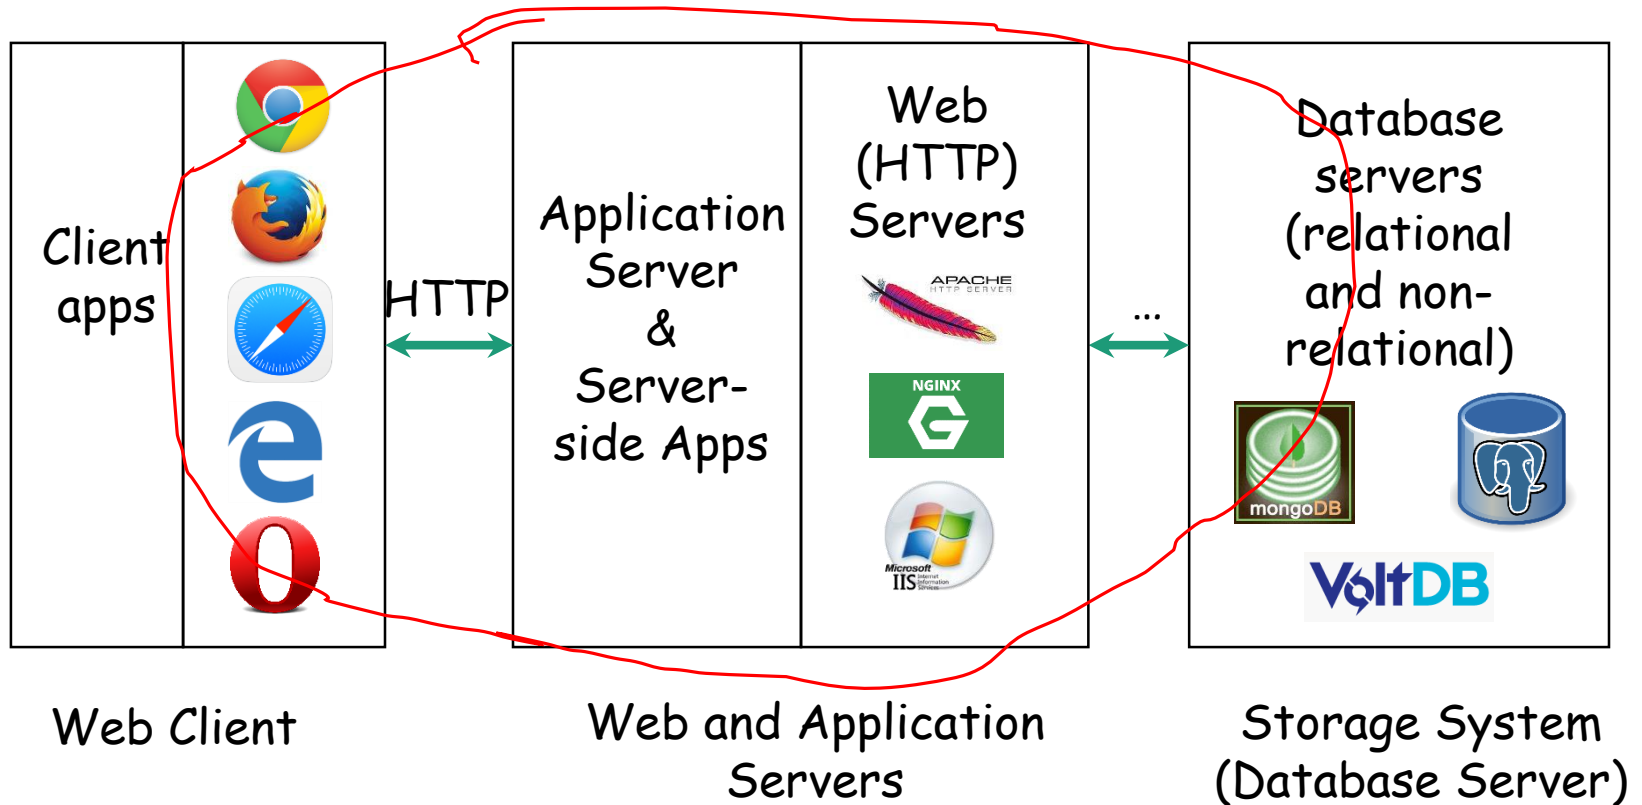

C30: Project 5: A Few Tips

Hui Chen

Department of Computer & Information Science

CUNY Brooklyn College

Web Application Architecture

Start-up Code

- The Game

- <https://github.com/CISC3120/sampleprograms/tree/master/TargetGameFXWeb>

- Web Services

- <https://github.com/CISC3120/sampleprograms/tree/master/web/GpaAppMono>

Feature: Push Game Statistics

- In the Target game
 - construct a URL (how should it be?)
 - Use `URLConnection` to invoke the Web service corresponding to the URL constructed in the above
- On the Web
 - Create a Spring Boot application
 - Select
 - Core -> DevTools
 - NoSql -> MonoDB
 - Template Engines -> Thymeleaf
 - Web -> Web
 - For styles, see *GpaAppMongo* to add WebJars for Bootstrap and others

Feature: Push Game Statistics

- On the Web
 - Create a Spring Boot application
 - Select
 - Core -> DevTools
 - NoSql -> MonoDB
 - Template Engines -> Thymeleaf
 - Web -> Web
 - For styles, see *GpaAppMongo* to add WebJars for Bootstrap and others
- For building view, see *GpaAppMongo*
