

CISC 3120

C13: Project Activities and Midterm Review

Hui Chen

Department of Computer & Information Science

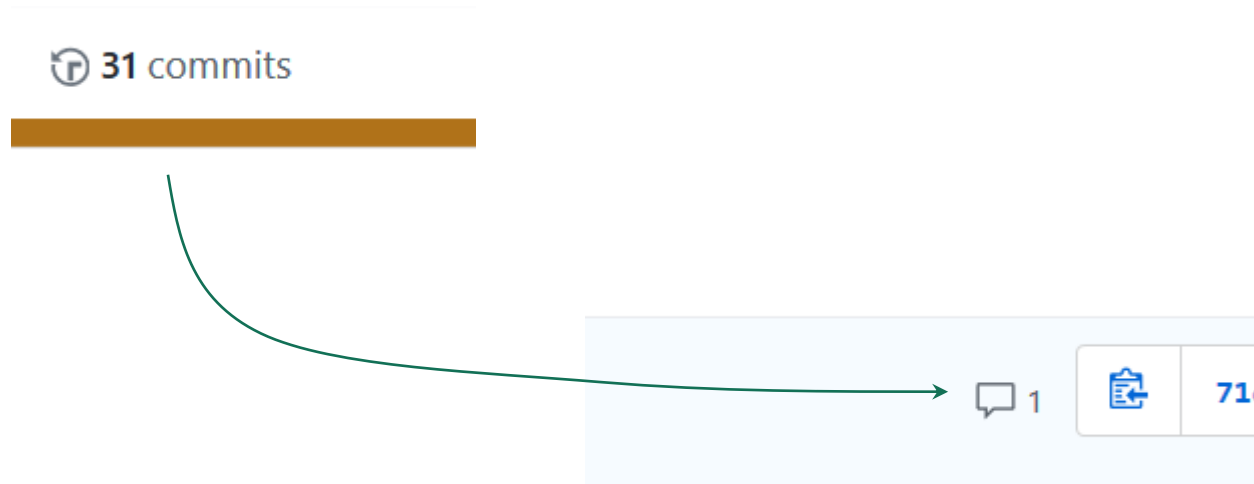

CUNY Brooklyn College

Outline

- Projects 1 - 3
- Midterm exam review

Project 1

- Finished project quality assessment
- Commented in Github

Project 2

- How are we doing?

Project 3: Design & Implement Applications

- 5 team projects (phases) to build a Treasure Hunt game application
 - Each built from start-up code or built from previous project (phase)
 - Text-based to GUI
 - Standalone to networked/distributed

Project 3

- Start to build the Treasure Hunt game application
 - A simple desktop application with graphical user interface
 - Game rules
 - A "treasure" is buried in a field, unearthing the treasure earns the player a score
 - Clues are given when the player solves a puzzler

Project 3: Objectives

- Design and implement an application's graphical user interface
- Design and implement the application with event-driven programming

Questions?

- Projects 1 - 3

Midterm Exam

- In class, Monday, March 19
- Review Guides 1 - 3
- Take-Home Tests 1 - 3

Questions

- Midterm exam?

Discuss in Teams

- Questions about the project
- Questions about midterm exam and preparation
