

# Project

Investigating IPv4 to IPv6 Transition Mechanisms

November 7, 2016  
Lastly revised on November 7, 2016  
Revision: cf1ab097296e

## 1 Project Description

In this project, you are to investigate transition mechanism from IPv4 to IPv6 using your own research. Your research agenda include at least the following,

1. list major issues that need to be addressed for IPv4 to IPv6 transition,
2. discuss in detail at least two issues.

## 2 Written Report

Your report must be *IEEE Transactions* format whose template can be found at [https://www.ieee.org/publications\\_standards/publications/authors/author\\_templates.html](https://www.ieee.org/publications_standards/publications/authors/author_templates.html).

Your report must be no less than 3 pages excluding references.

## 3 Grading

The grade of your project depends on quality and thoroughness of your research and quality of your writing.

## 4 Submission

Upload your report in Blackboard by 11:59PM, November 29.
